+44 7440691073

Software developer with a strong focus on best practices and continuous learning. Experienced in building solutions across industries like advertising, retail, finance, healthcare, tourism, software, and education. Skilled in starting projects from scratch and choosing the right technologies. Proficient in front-end development and Node.js, with knowledge of back-end technologies, cloud services, and databases. Dedicated to writing clean, efficient code, improving performance, and collaborating with teams. Excited to take on new challenges and contribute effectively.

Skills

Front-end technologies: JavaScript, TypeScript, React, Next.js, Zustand, Redux/Toolkit, Apollo, GraphQL and validation frameworks, internalisation, routing and templating libraries.

Markup Languages: HTML5, CSS3 (SASS/SCSS), SVG, XML, JSON.

Cloud Services: AWS, Git, Atlassian, GitHub

Back-end Technologies: Node JS, Express, Java, Springboot, Microservices, MongoDB.

Databases: MS SQL, MySQL, PostgreSQL, MongoDB.

Design Tools: Figma, Sketch, Photoshop, Illustrator (front-end only).

Solid understanding of programming principles such as Functional Programming, SOLID, DRY, KISS, YAGNI, Separation of Concerns, BEM, Atomic Design, and focus on code readability. Experienced with Cloud services, 3rd party API implementations.

Experience

RUYA Ruya.co
Co-founder / Jr. Software Developer

July 2024 – Continues | London, Remote | Permanent

AI-powered dream interpretation and journaling app utilised with React, TypeScript, Next.js, Zustand, NodeJS, Express, HTML5, SCSS, and Rest API.

Infosys
System Associate

2023 – 2024 | London, Remote

Java, Node.js, React, Testing, RESTful API design, Clean Architecture

CodeYourFuture
Software Engineer Trainee

2023 - 2024 | London

Completed an intensive Full Stack Web Development and Cloud Computing training program (25-30 hours weekly). Built skills in HTML, CSS, JavaScript, React.js, Node.js, PostgreSQL, and MongoDB, and gained hands-on experience deploying AWS web applications (S3, EC2, RDS) with GitHub Actions, Docker, Terraform, and AWS IAM, while collaborating in Agile teams using Git, Slack, Zoom, and Google Meet

QA
Software Engineer Trainee

2022 | London

Completed an intensive training course and earned certifications in MySQL, Python, Java, and Azure. Developed a solid foundation in designing and optimizing databases with MySQL, crafting versatile applications using Python and Java, and deploying scalable, secure solutions on Azure. Emphasized best practices in version control, Agile collaboration, and industry-standard development workflows.

Holmes Education Group
Technical Support Specialist

2021 - 2022 | London

Responsible for gathering data and doing research. I used customer service data, observations, market trends, and reports to clearly understand the department's operations and ways to improve them.

Kinay Logistic
Import and Export Coordinator

2011 - 2017 | Istanbul

Coordinate air, ocean, and road freight shipments from initiation to completion. This includes scheduling transportation, processing AWB, managing customs entries, handling invoicing, and overseeing loading expenses. Additionally, assist with quotations, collaborate with team members, and develop and update SOPs for regular clients, while also supporting other business areas as needed.

Education

Marmara University | Bachelor's Degree | Business Administration and Management | Istanbul

Notes

I'm happy to provide reference letters from my previous roles if requested. They show the quality of my work and the positive difference I made on each project.
